1712 This line by the Treaty of Utrecht was settled as the Dividing line betwixt Canada & Hudson's Bay.
This line of North latitude 48°, was the Northern boundary of the Grant made by King Iames the first to the Council of Plymouth in 1621:
But in the year 1632, King Charles the first ceded all the lands laying to the northward of Canada River, to the French;
and Canada, or New France was indefinite in its northern boundaries till the year 1712.
By the Treaty of Utrecht, the lines between the English and French were thus adjusted: Beginning on the Atlantic Ocean
in North latitude 58° 30, thence running South West to Lake Mistasin, and thence continuing S.W. till the line touched 45° North latitude
and thence West indefinitely.
