Copy
of a Map presented to the Congres
by Peter Pond a native of Milford in the State of Connecticut.

The extraordinary man has resided 17 years in those countries & from his own discoveries as well as from the reports of Indians the appears himself of having at last discovered a passage to the N.W. sea; he is gone again to ascertain some important observations... New York 1st March 1785.

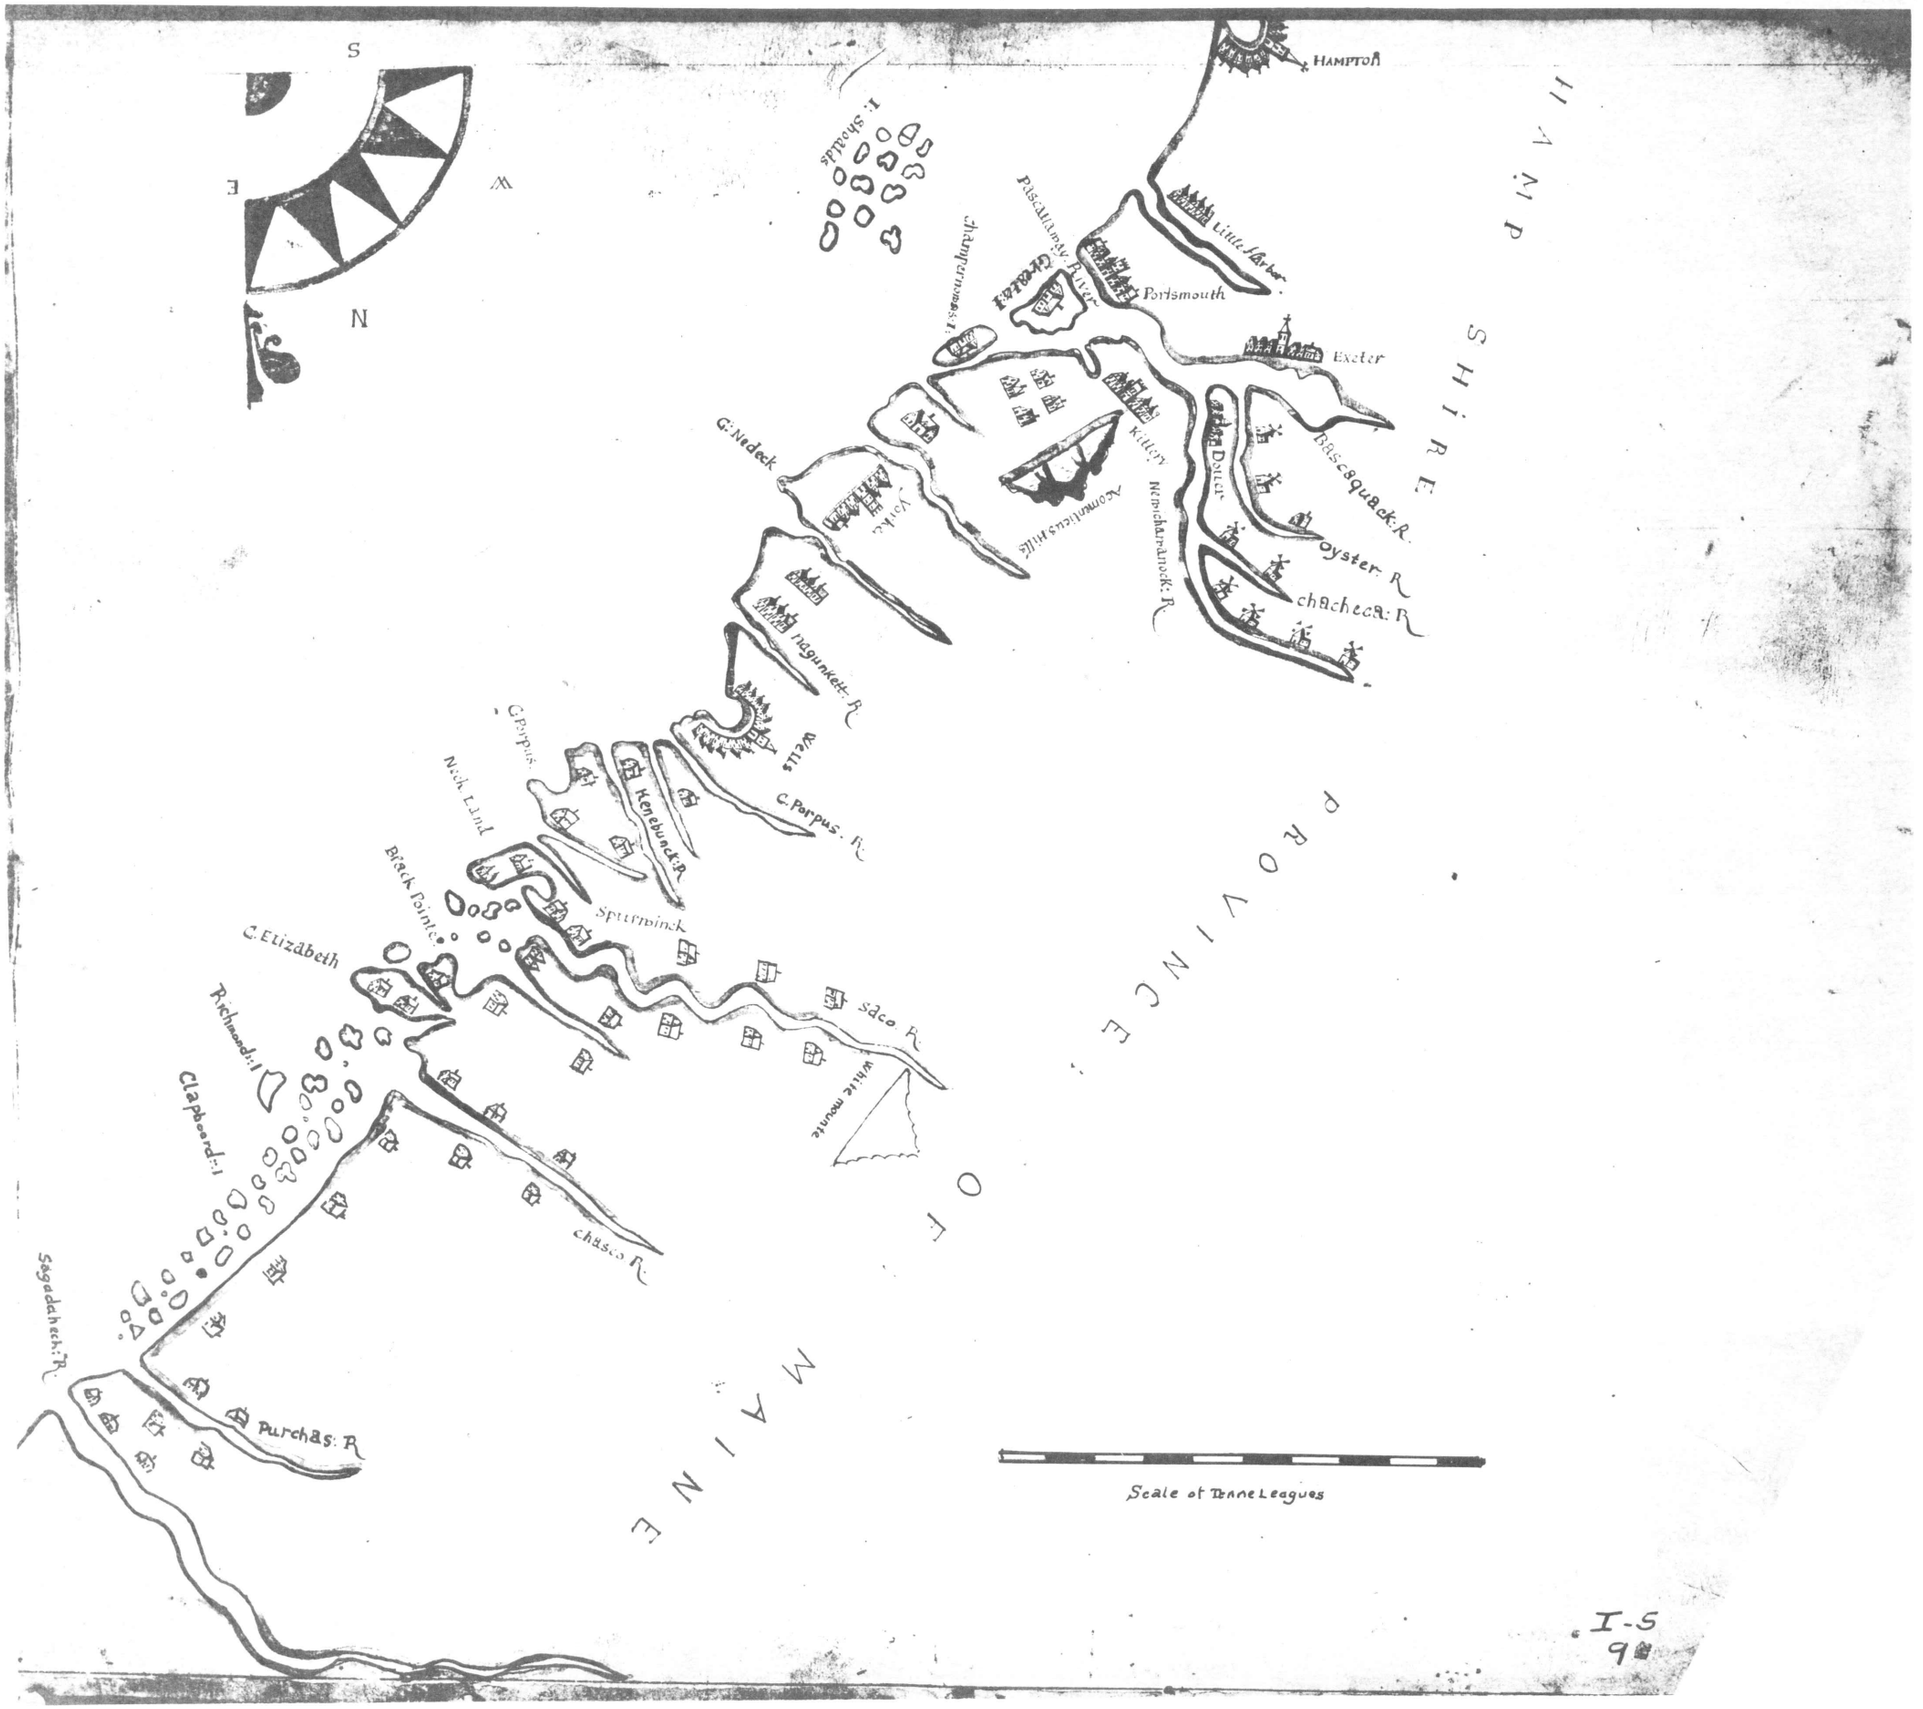

The original Map being incumbered with great deal of writing, i have thought it best to numerise it separately with the references marked by figures numbers... Copied by M. John de Crevecoeur, for his Grace of the Rochefoucault
