
A PLAN
of the RIVER St IOHN
wherein is delineated the several Allotments of Land
Granted and laid out to be Granted
Loyal Emigrants and disbanded Corps
done under the Orders & directions
of His Excellency Governor Parr
By Charles Morris S. Gen.l 1786.
FROM the Source of the River S.t John to its Mouth is about
the Day of Sundy is Three Hundred and Seventy Miles —
The Land on both sides of a greater compass, but the River is Navi-
gable for Vessels of 100 Tons Burthen as high up as Edmonds Navi-
the Island Beaver, Surgeon, and abounds in a variety of Fish such as
Bass, Salmon, Sturgeon, Trout, Eels, Suckers, Perch & Gaspereaux — there
are a great Number of Small Rivers, Brooks & Streams emptying into the
St. John, on most of which are choice Situations for the erecting of Saw
Mills, and abundance of valuable Timber to supply them —
The Meadows laying between the Interval and
Upland naturally produce a coarse Grass which serves very well to
keep young Cattle over Winter, if Cut & made into Hay in proper Season
The St. Johns Indians and the Passamaquoddy
Indians have a communication by this River
only two Miles Portage
