NEW SOUTH WALES

The track ... is that of Colonial Schooner Francis in 1798 } from Port Jackson by M. Flinders
Sloop Norfolk in 1798 & 9. }

... is the Whale boats track by Gr. Bass Surgeon of H.M.S. Reliance.

The single x denote the courses steered, the ... the set of the flood tide.

The shore from Port Jackson to Western Port was coasted by Mr. Bass in a whale boat. The water shaded parts are copied from his eye sketch. The Ram Head being placed according to Capt. Cooks Longitude & taken as a fixed point. The long board is extended beyond its limits in a former Chart, to shew Wilsons Promontory, & the relative position with Furneaux Islands which they seem to require. A deadreckoning must necessarily be incorrect in the way of such a tide as runs here. 'Tis by its authority only that they are thus placed.

The Islands are carried to the Eastward of their situations by Capt. Furneaux. They are placed according to the Longitude in Port Dalrymple & the run of it from Swan Isles. The beginning & end of a Lunar Eclipse observed at the East end of Preservation Island gave Vlo. 3h 30m.

Port Dalrymple.
Var.n 7°30 E. Nov.r 98
d 30 by Theodolite
High Water 11h. rises 7 feet.
The Tides run strong.
VAN DIEMENS LAND.
Circumnavigated in the Colonial Sloop Norfolk by M. Flinders, 2nd Lieut. of H.M. Ship Reliance. By Order of His Excellency Governor Hunter 1798.9
Port Dalrymple is laid down by sets of lunars on each side of the moon by two Sextants. The rest of the North & West sides are by nothing better than a dead reckoning, corrected by bearings along the Coast. But on making the SW. Cape we found an error of only 5 of Long.e from its situation in Capt. Cooks last Voyage, the whole remains as we made it. Adventure Bay is copied from Capt. Cooks sketch. Oct. Edit. Dublin. Swilly Rock & Pedra Blanco is placed 59 of Long.e East of the SW Cape, according to the Table there given, which agrees with an indistinct bearing we had of it. The unshaded East Coast was laid down by Capt. Furneaux's Ors copied from a chart of New South Wales on a scale of about one inch to a degree of Longitude.
The water shaded part about Oyster Bay, is copied from a plan of about 5 inches to a degree by J. H. Cox Esq.r published by Mr. Dalrymple in 1791.
The parts touchd with yellow are copied from a manuscript chart by Mr. J. Hayes, who visited the SE. end of Van Diemens Island in a ship called the Duke from Bengal, their accuracy I cannot answer for. Hounslows Bay & Cape Hanson in his Chart, are alltered to Frederick Henry Bay and Cape Pillar. A few other alterations are made in the names, where examined in the Sloop. Her Ports & Bays are called Coves & her Rivers, Creeks.
High water Derwent 6h. rises 9m. Spect. The tides are weak & scarcely seem always to coincide with the rise & fall but sometimes to run contrary, we had reason to suspect a counter current at the bottom.
