A SKETCH of the HARBOURS near CAPE FLORIDA

Dry Tortuga

From West Key to Key Largo is 50 Leagues

Some Account of the Harbours &c.

Matamoras Bay Key, affords a harbour 4 fathom water, not less than 3 in the shallowest part of the Entrance, here is fresh water.

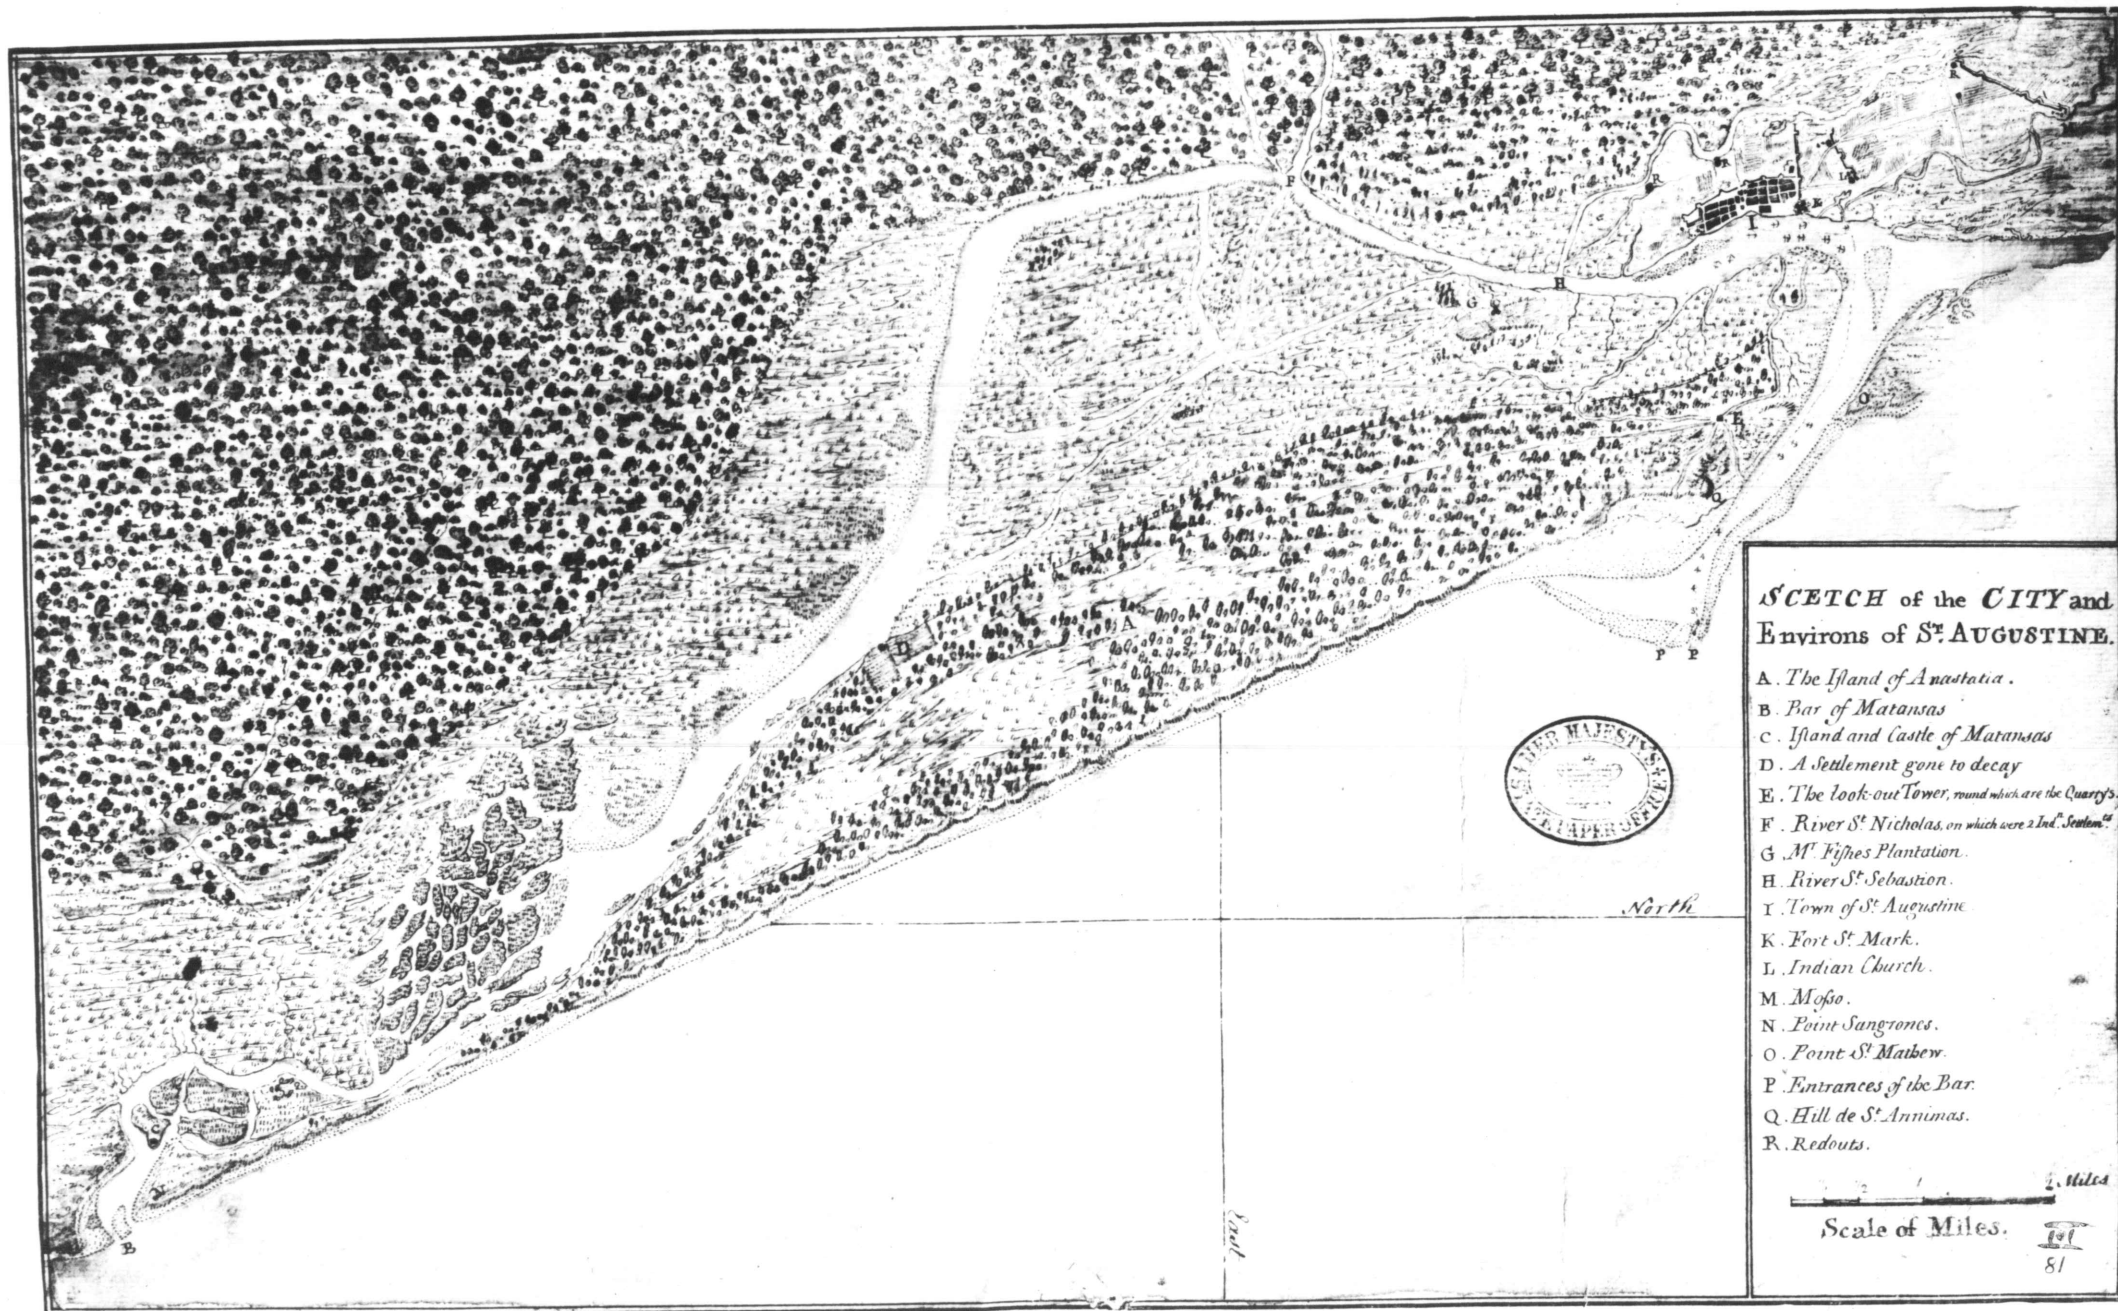

Bay of Honda, affords a harbour 3 fathom water; fresh water here.

West Key affords the same conveniences

All the Keys abound with Deer and Turtle, at Key Largo the people of Providence catch their turtle and cut Mahogany, the plants of which are large, the wood is harder and of greater variety than the Jamaica, but less prized by Carpenters, as not so easily worked and not so fit for glazing.

The ground is good and produces trees of all sorts, also Indian and European Fruit and Roots.

N.B. The dotted line shows where there is Soundings.

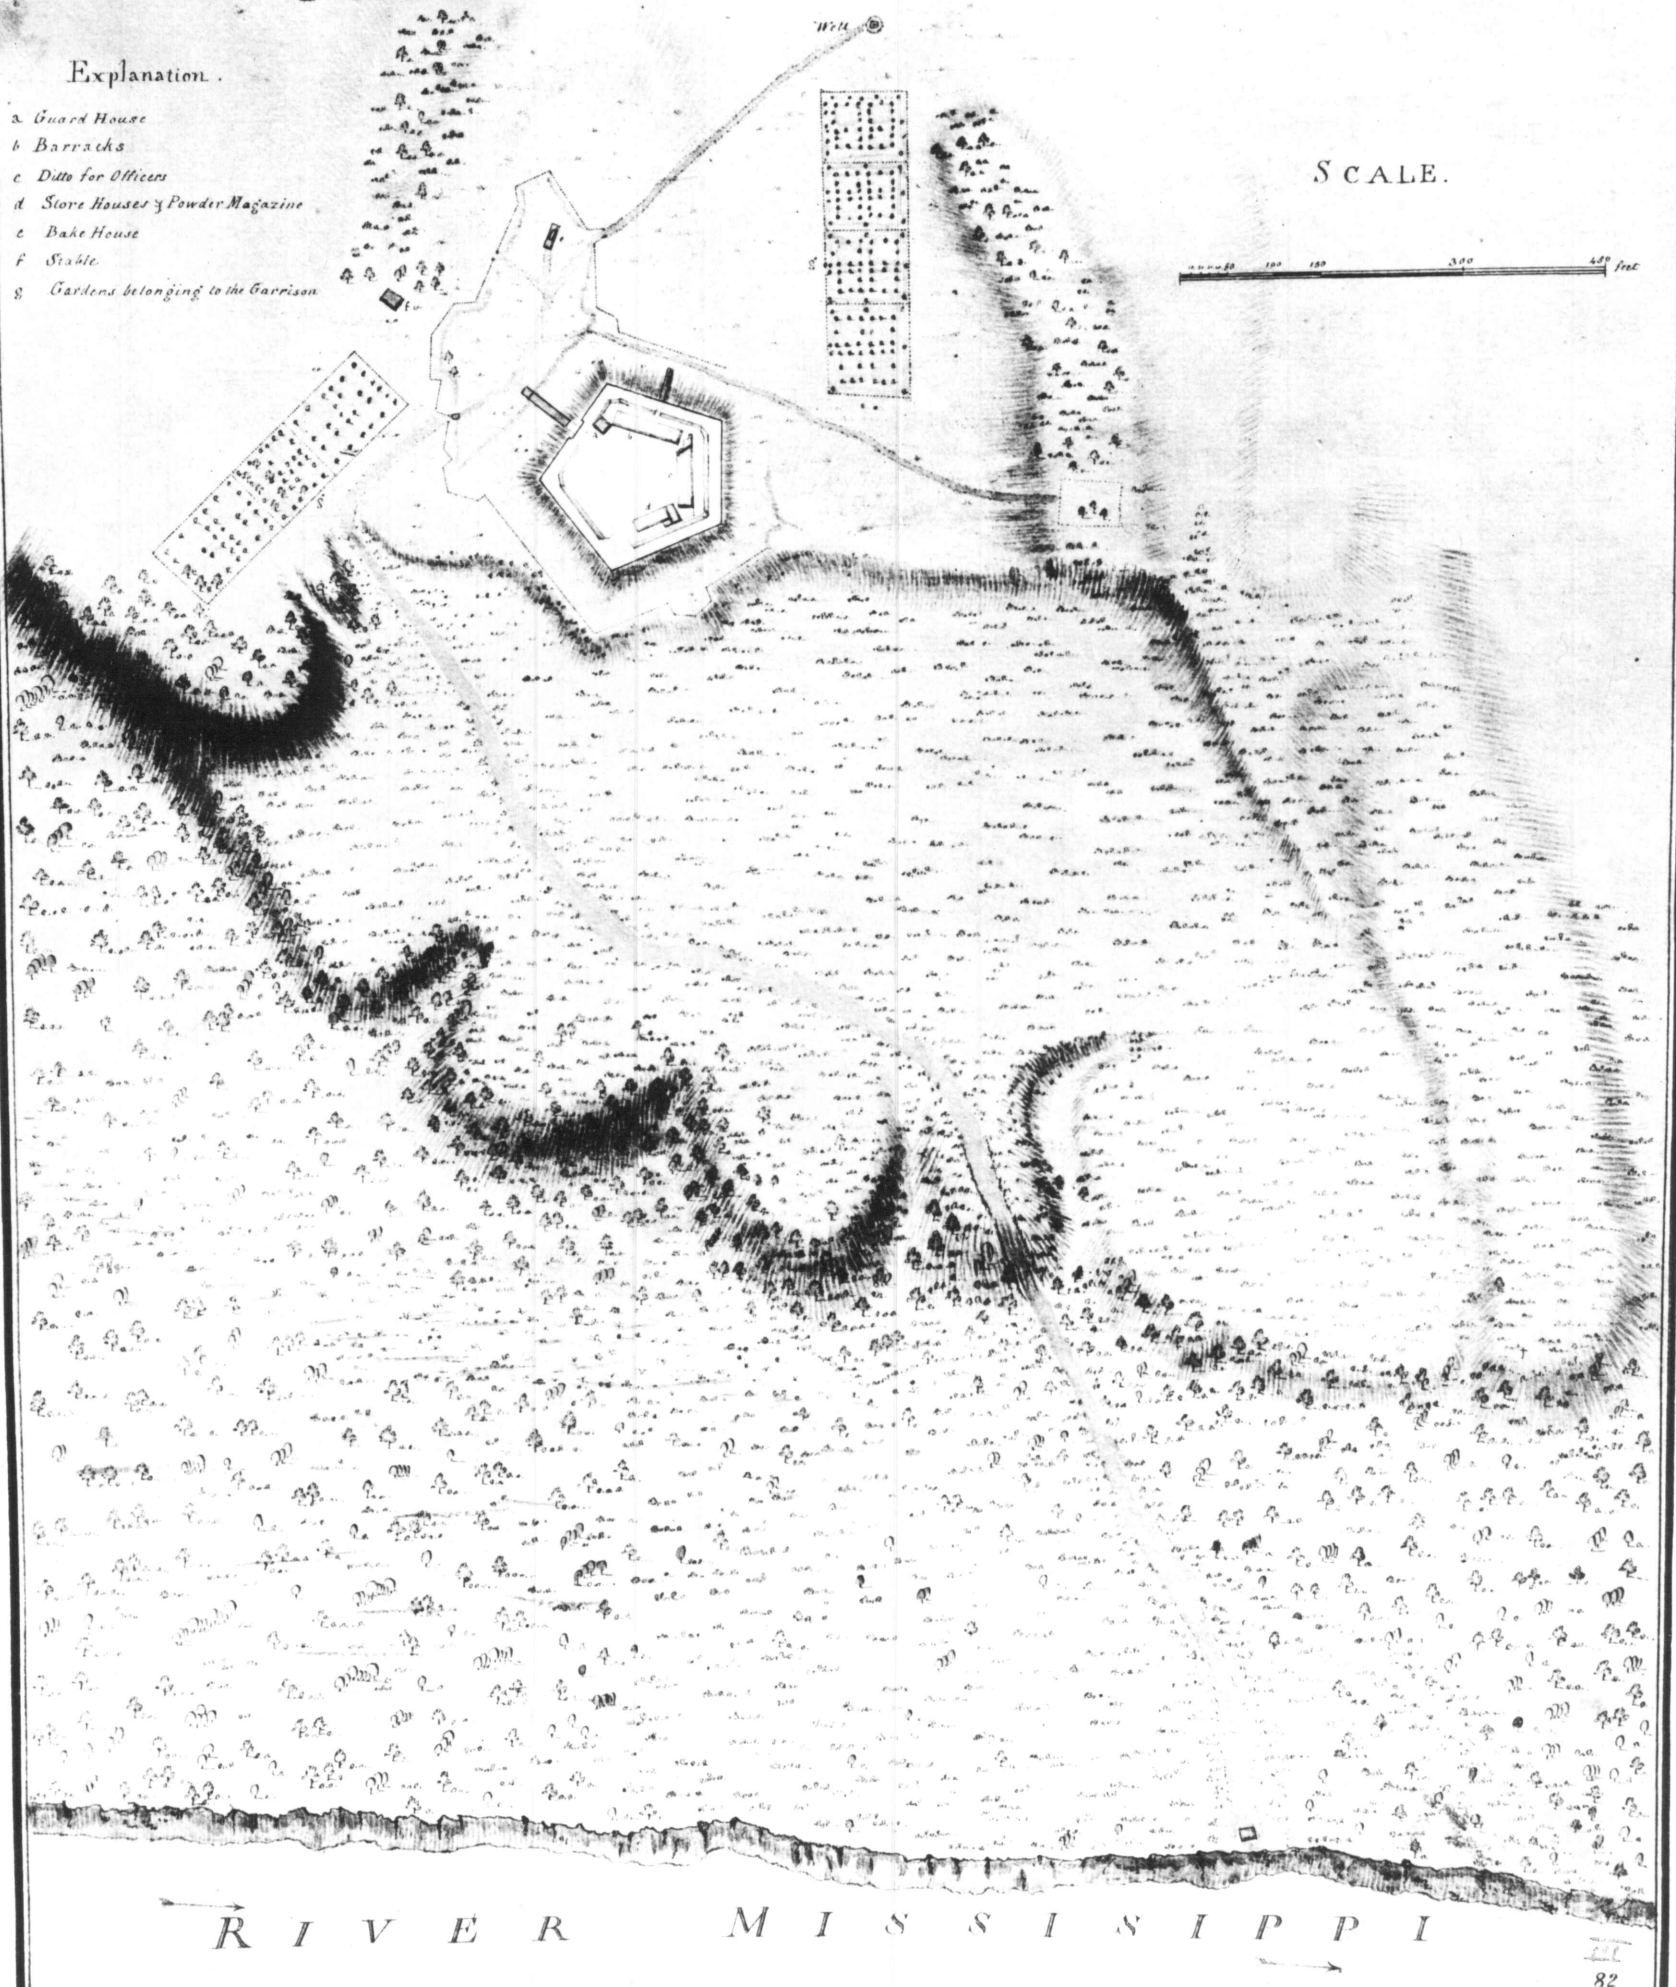

PLAN OF FORT ROSALIA

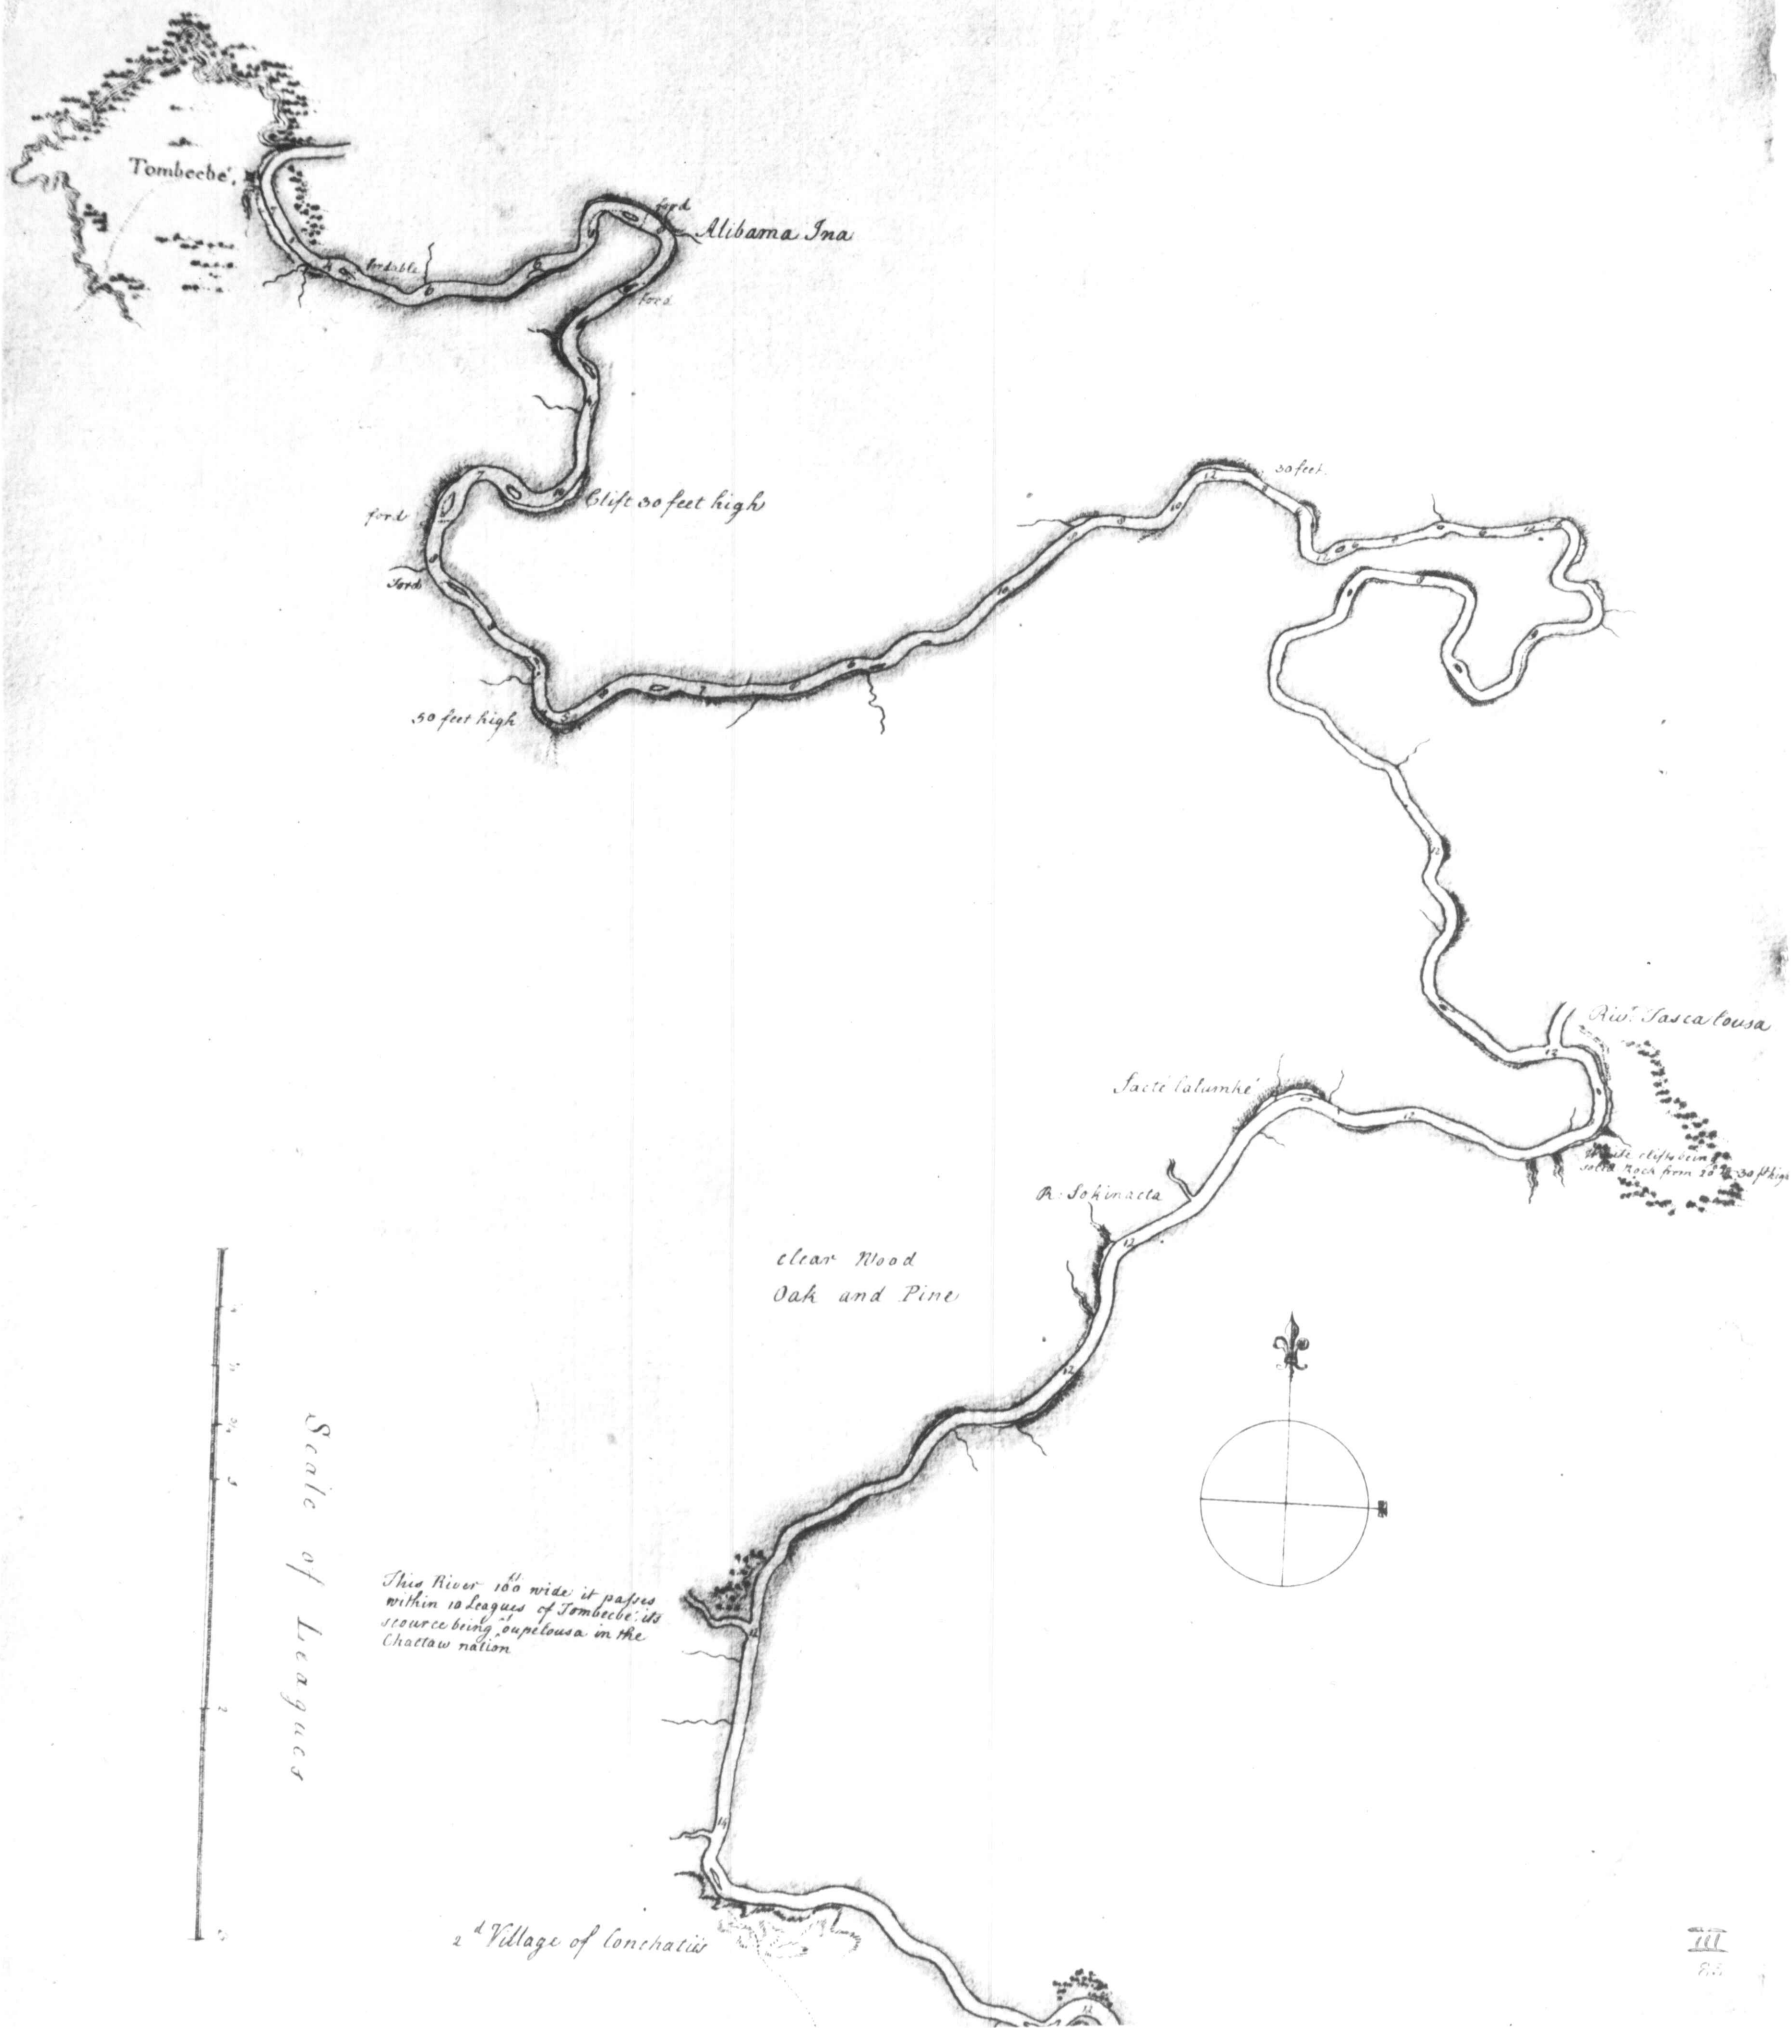

Explanation.

- a Guard House
- b Barracks
- c Datto for Officers

A DRA of the RIVER M

HEIGHT the MOBILE

Flat Rock, not above half a foot water on it, when the river is at the lowest. The channel is on the West side, and is never less than 3 feet deep, running over a solid rock.

Pense
thus far the Indians granted to
Gov. Johnston at a red-grape field
in 1768.

Thus far navigable for
Shoals and ledgers, till
the year

Indian Village
abandoned

Chapato

REMARKS

The source of this River lies E by S of the Heights of Margot 25 leagues and empties itself into the Bay of Mobile. The distance is about 90 leagues, the banks of the river (except some heights which are overflowed in the rainy seasons, but it has been observed by persons who are fond of the richness of the soil, which for this reason is in very low, and is always covered in the rainy seasons. The greatest has been observed at Tombecté in those seasons is 40 feet perpendicular height of 10 or 12 feet in the 24 hours, but this diminishes gradually, descending 7 or 8 feet is the utmost can be perceived. The banks of the river for most which are almost impenetrable, and very large; they afford a variety which are Cedar, Cypress, every kind of oak, elm, ash, and hickory, The country abounds with game and wild fowl.

to on the R. Mississippi about
 distance from Mobile to Tombigbee
 have noted in the places generally
 who have cultivated them, that there
 is a great deal of all the points are
 not rice and fall of the water, not
 right, and have rice at the rate
 of the river, so that at Mobile
 not least are covered with trees
 of excellent and useful woods amongst
 the river water is wholesome
